Health, Behavioral Health, and Safety

Tips for Families from the National Center on Health, Behavioral Health, and Safety

You Can Promote Good Oral Health By:

- Knowing how to make sure you and your family have healthy mouths and teeth
- Helping your children learn good mouth and teeth habits

Why Is It Important?

When Children Have a Healthy Mouth, They:

- Can speak clearly
- Can eat healthy foods
- Feel good about themselves

Having a Healthy Mouth Also Means:

- Healthy growth and development
- Being able to focus and learn
- A pain-free mouth
- Lower dental care costs for your family

Things You Can Do to Help Your Child

- Brush your child's teeth with fluoride toothpaste twice a day.
- If your child is younger than 3 years, brush with a smear of fluoride toothpaste.
- If your child is age 3 to 6 years, brush with a pea-size amount of fluoride toothpaste.
- Young children will want to brush their own teeth, but they need help until their hand skills are better. Brush children's teeth or help children brush their teeth until they are about 7 or 8 years old.
- Be a role model for oral health! Brush your teeth with fluoride toothpaste twice a day (in the morning and at bedtime) and floss once a day.
- Serve healthy meals and snacks like fruits, vegetables, low-fat milk and milk products,

whole-grain products, meat, fish, chicken, eggs, and beans.

- Limit the number of snacks your child has in a day.
- Do not give your child food for rewards.
- Take your child to the dentist for a check up by her first birthday and keep taking her.
- If your child has not gone to the dentist take him.
- Ask your dentist what you can do to keep your mouth and your child's mouth healthy.
- Make sure to go to the dentist as often as your dentist would like you to go.
- Let your child care, Early Head Start, or Head Start program know if you need help or have questions about oral health.
