

SCHOOL BASED ORAL HEALTH PROGRAM

GERISMILES MOBILE DENTAL HYGIENE PRACTICE

TRAVIS D. TRAMEL, PH.D., MA, RDHAP

SCHOOL BASED DENTAL MODEL

- Oral health programs provide evidence-based oral healthcare services like screening, prophylaxis (cleanings), fluoride varnish, and dental sealants to children. Dental professionals deliver preventive dental services within schools.

WHICH PROGRAM WILL YOU TARGET?

- Kindergarten Oral Health Assessments
- School Based Sealant Program

HOW'S IT BEING IMPLEMENTED IN SCHOOLS

- Talk with School District Nurse, Wellness Director, or Student Services Director
- Setup meetings to discuss potential partnerships
- What type of partnership works for the School District and County
- Who will be involved in contracting Phase?
- How to employ or contract RDHAPs

TELEDENTISTRY

- Teledentistry is the use of telehealth technologies to facilitate and expand access to oral healthcare services.
 - Synchronous (or live video) – Delivering consultation and treatment using live, audiovisual technology, so a dental professional can provide a remote consultation or visit in real time.
