

Achieving California State Oral Health Plan Objectives

Jayanth Kumar, DDS, MPH
State Dental Director

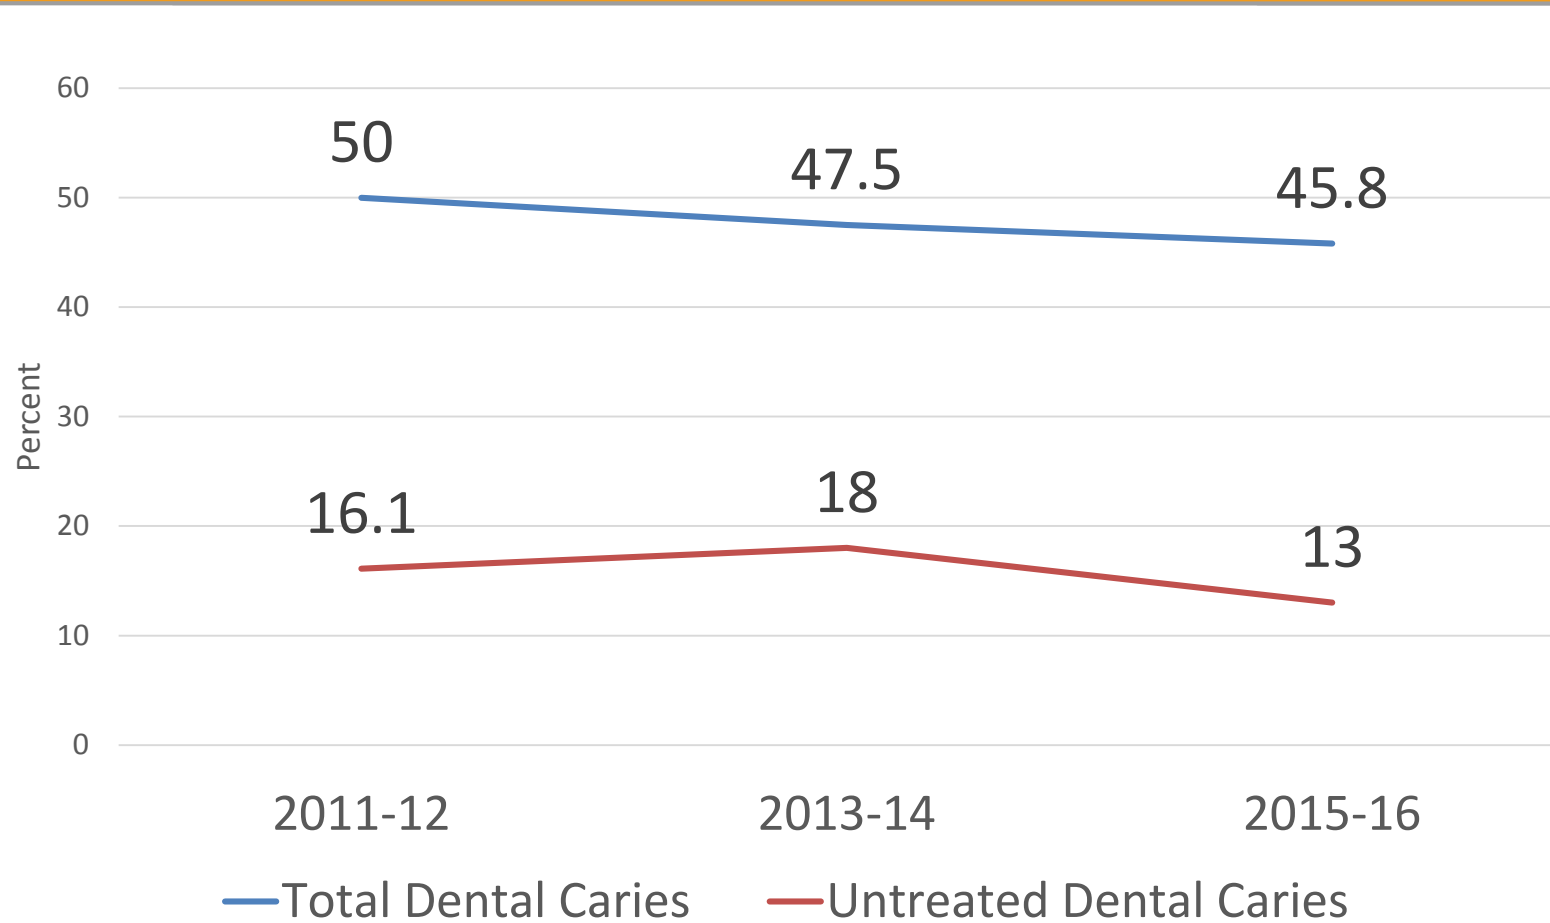

Local Oral Health Program Project Directors Meeting
1/17/2019

Key Grant Outcomes

- Reduction in oral diseases
- Elimination of oral health disparities
- Increase in the number of people engaged in healthy habits
- Increase in the number of policies and programs
- Increase in infrastructure and capacity

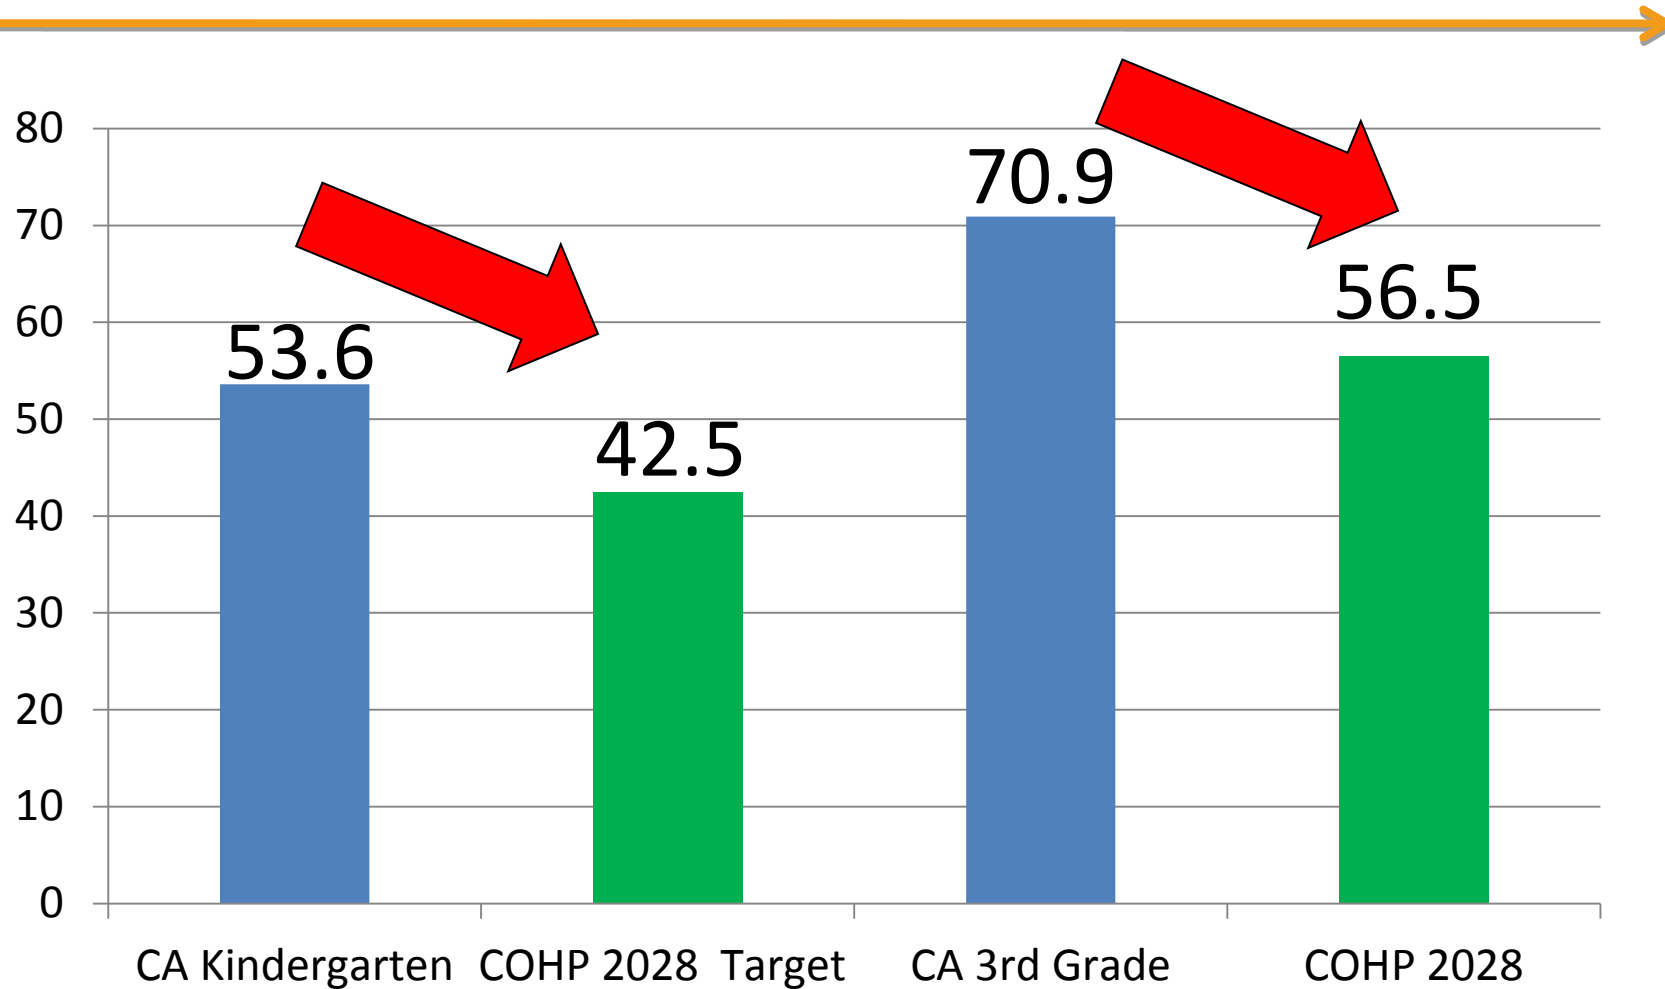

National Trends

Trends in prevalence of **total dental caries** and **untreated dental caries** in primary or permanent teeth among youth aged 2–19 years: United States, 2011–2012 through 2015–2016

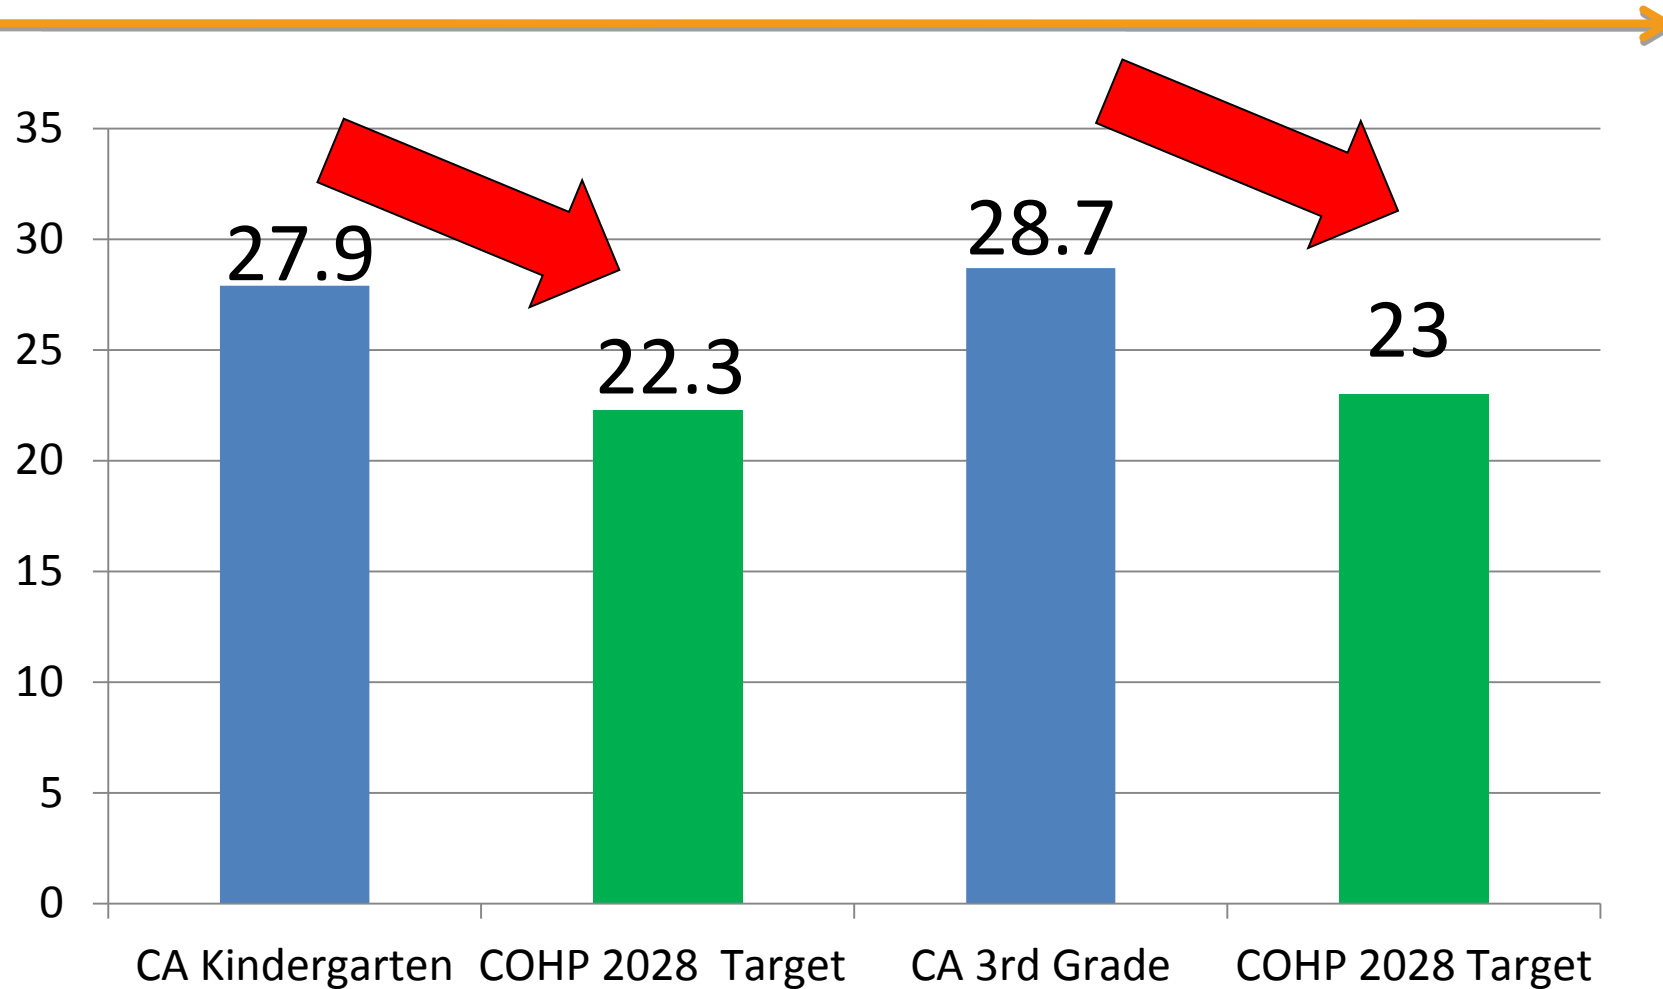

Tooth Decay in Children

The California Smile Survey, 2006 and COHP 2028 Target

Untreated Tooth Decay in Children

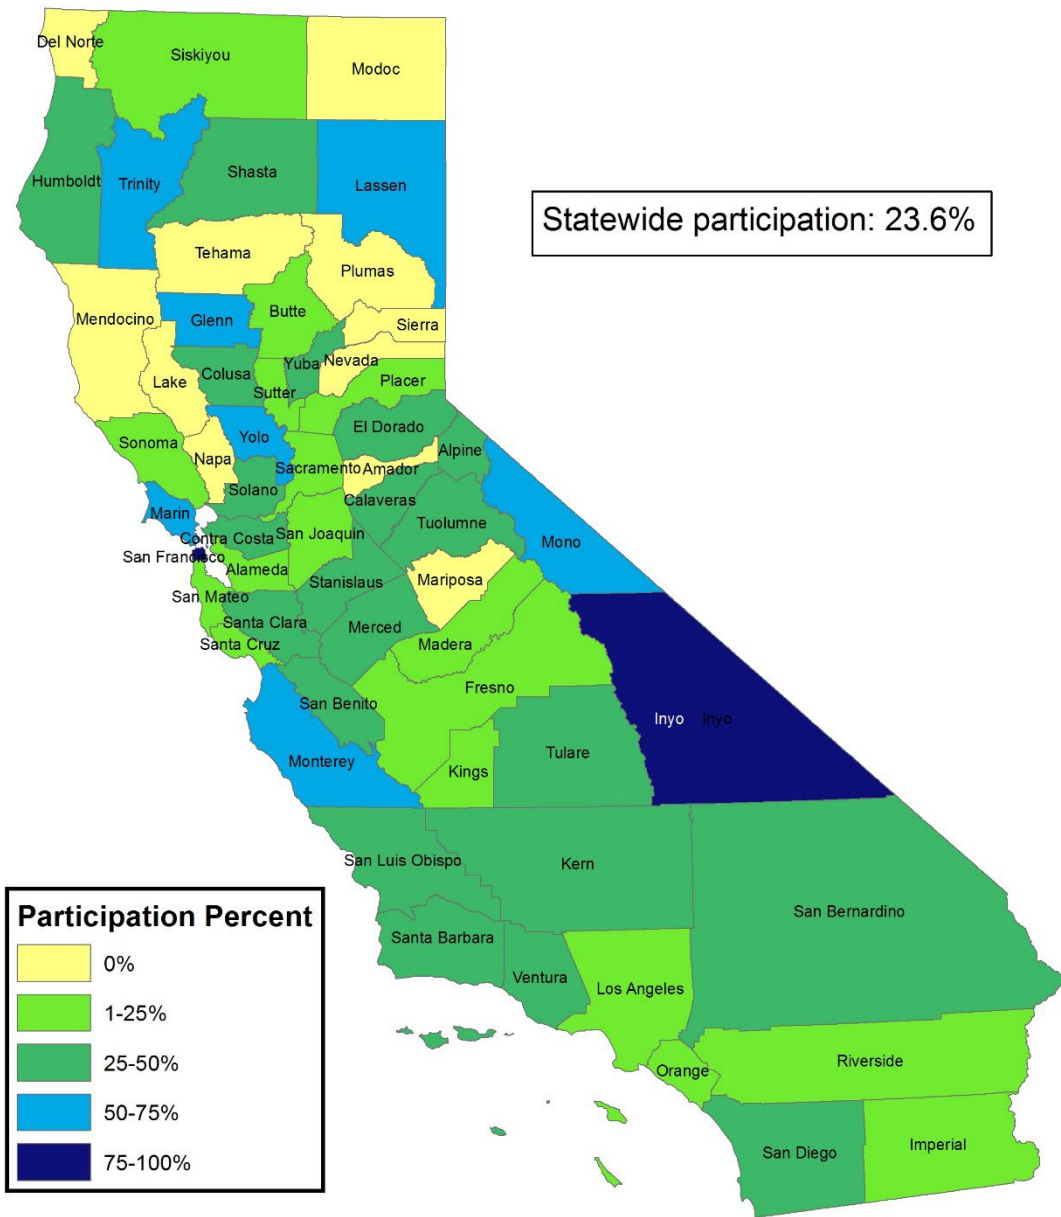

The California Smile Survey, 2006 and COHP 2028 Target

Kindergarten Assessment Requirement Policy

- Ensure assessment is performed
- Link children to a source of dental care
- Identify barriers to care
- Inform, educate and mobilize the community
- Develop policies and programs
- Evaluate trends
- Conduct research

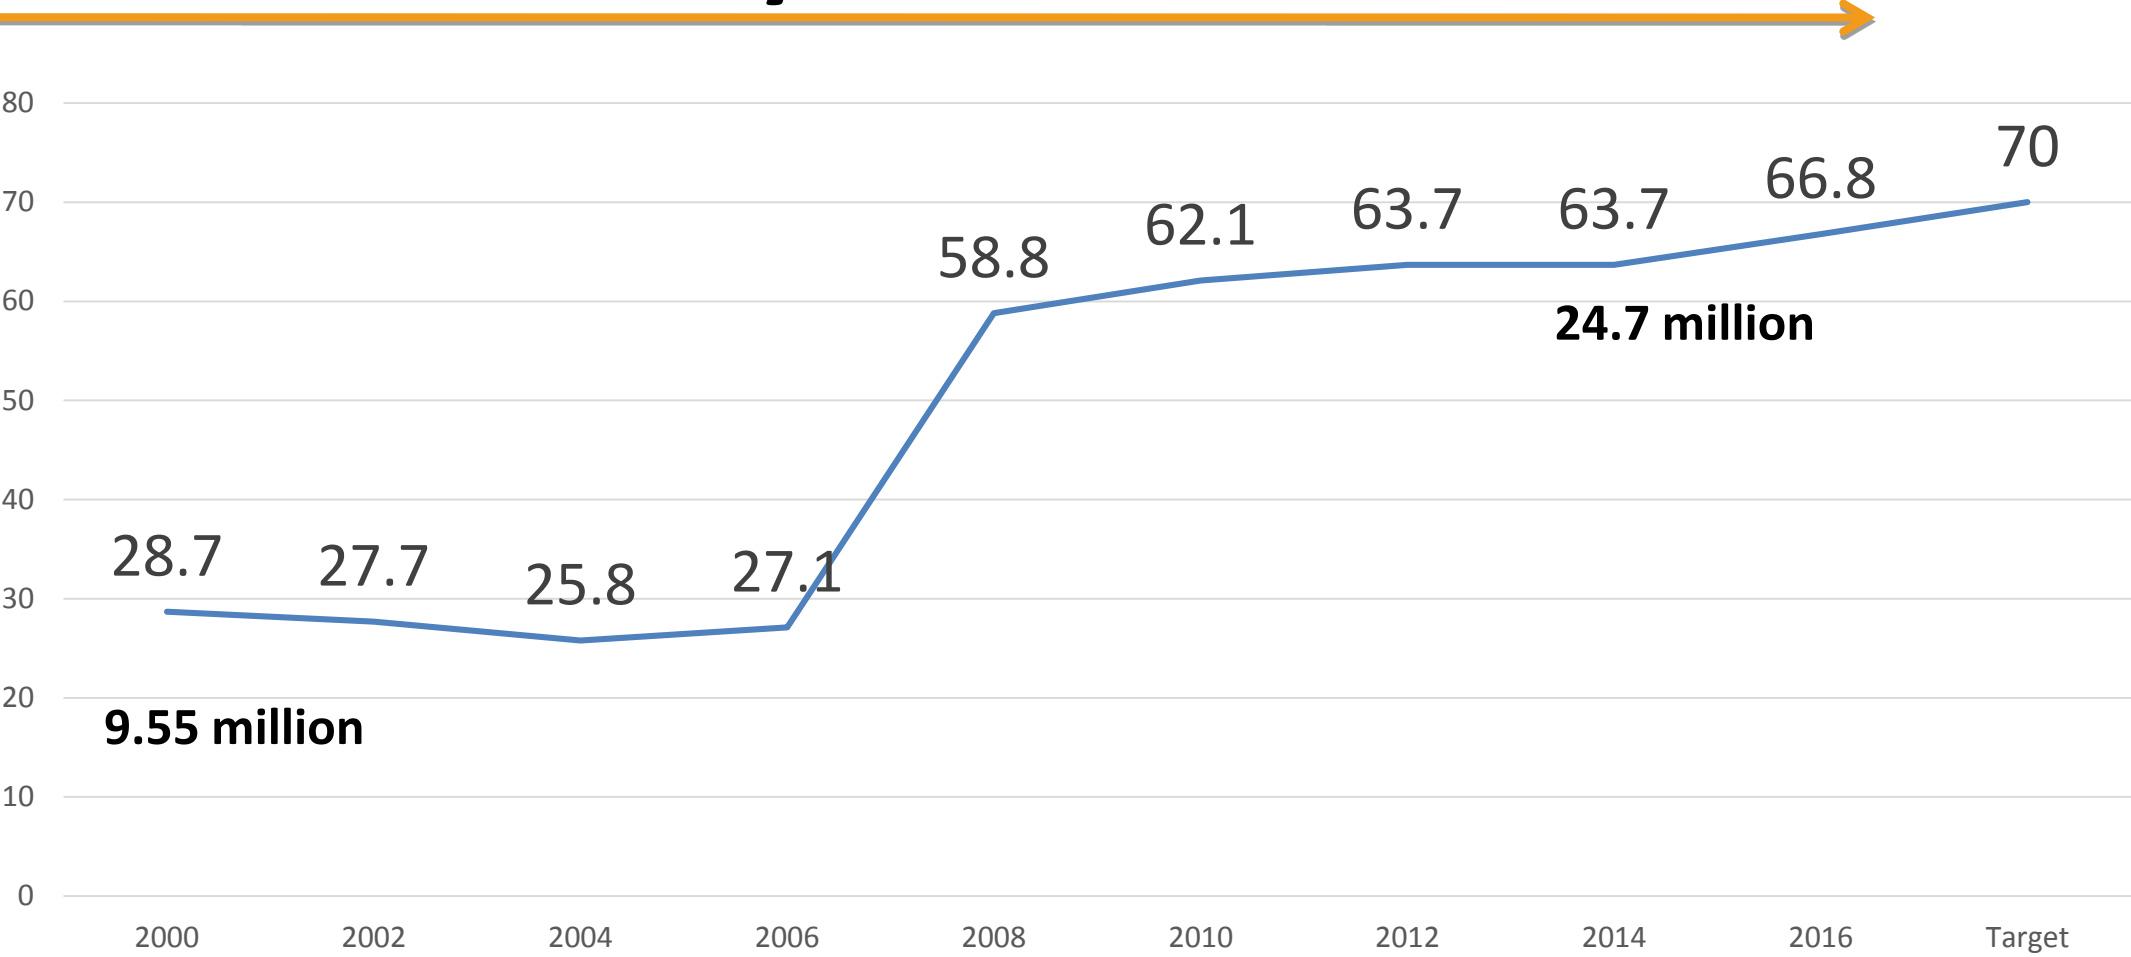

California Kindergarten Oral Health Assessment Participation Rate by County, 2017

- As reported in the System for California Oral Health Reporting (SCOHR)

Percent of the population receiving Community Water Fluoridation

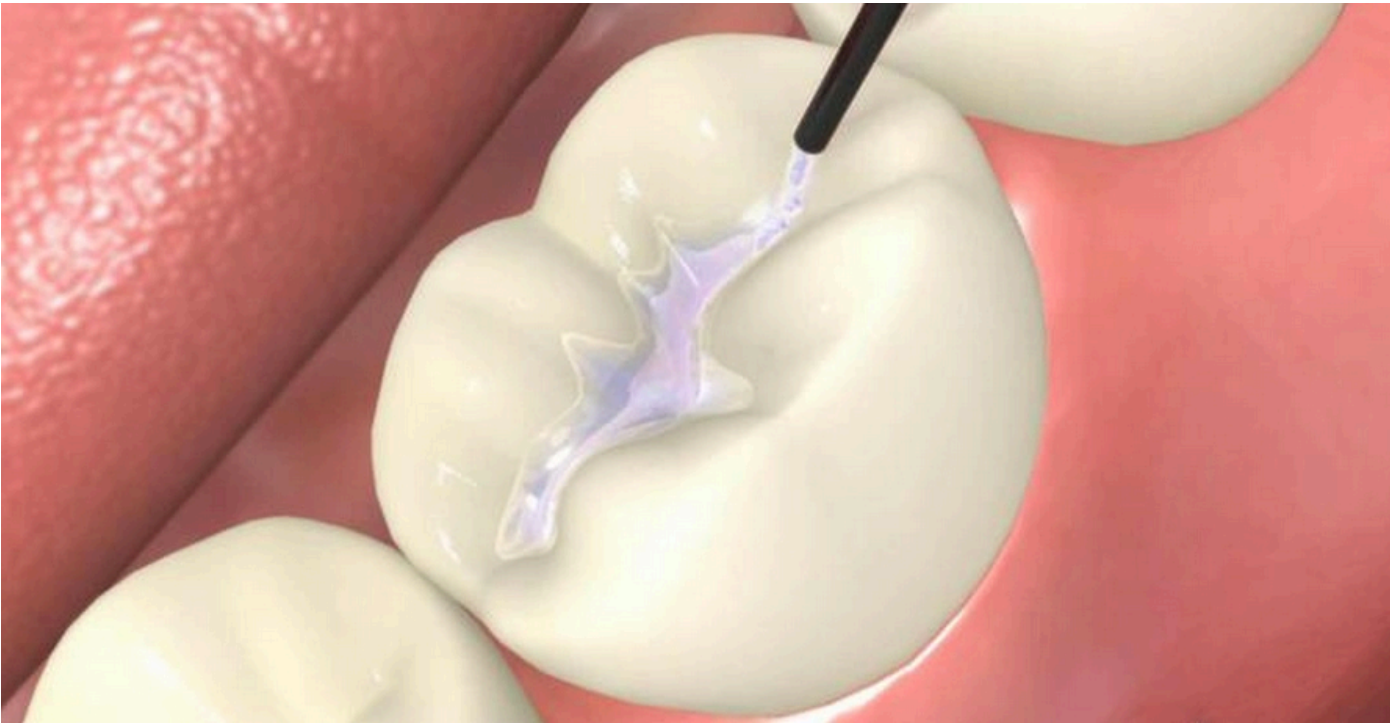

Community Water Fluoridation

- Increase tap water consumption
- Maintain a quality program
 - Training
- Address roll back efforts
- Promote to expand fluoridation

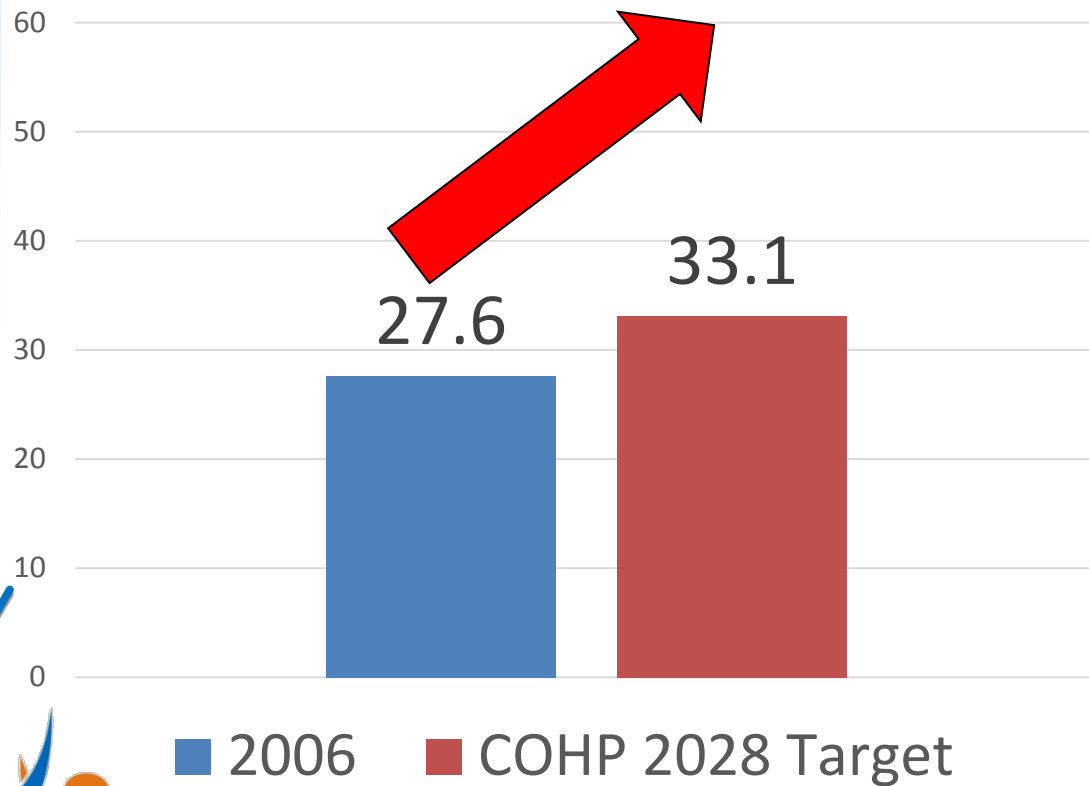

Dental Visit and Use of Preventive Services

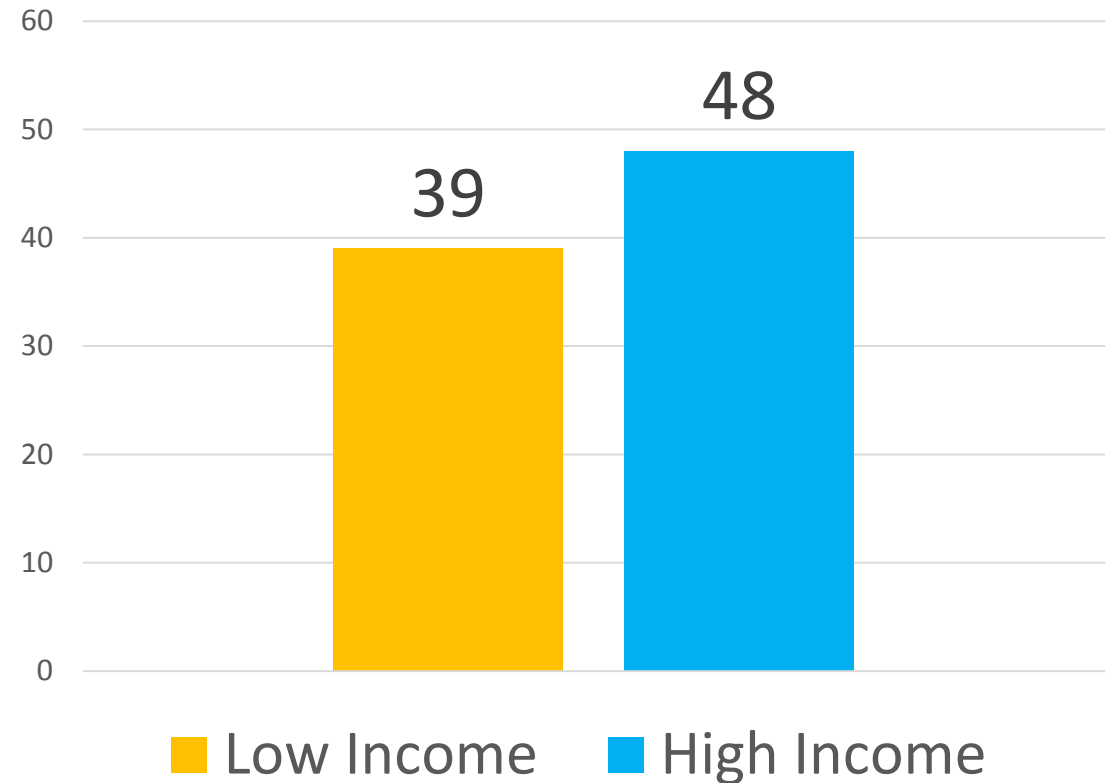

Dental Sealant Prevalence in 3rd Grade Children

California 3rd Grade Children

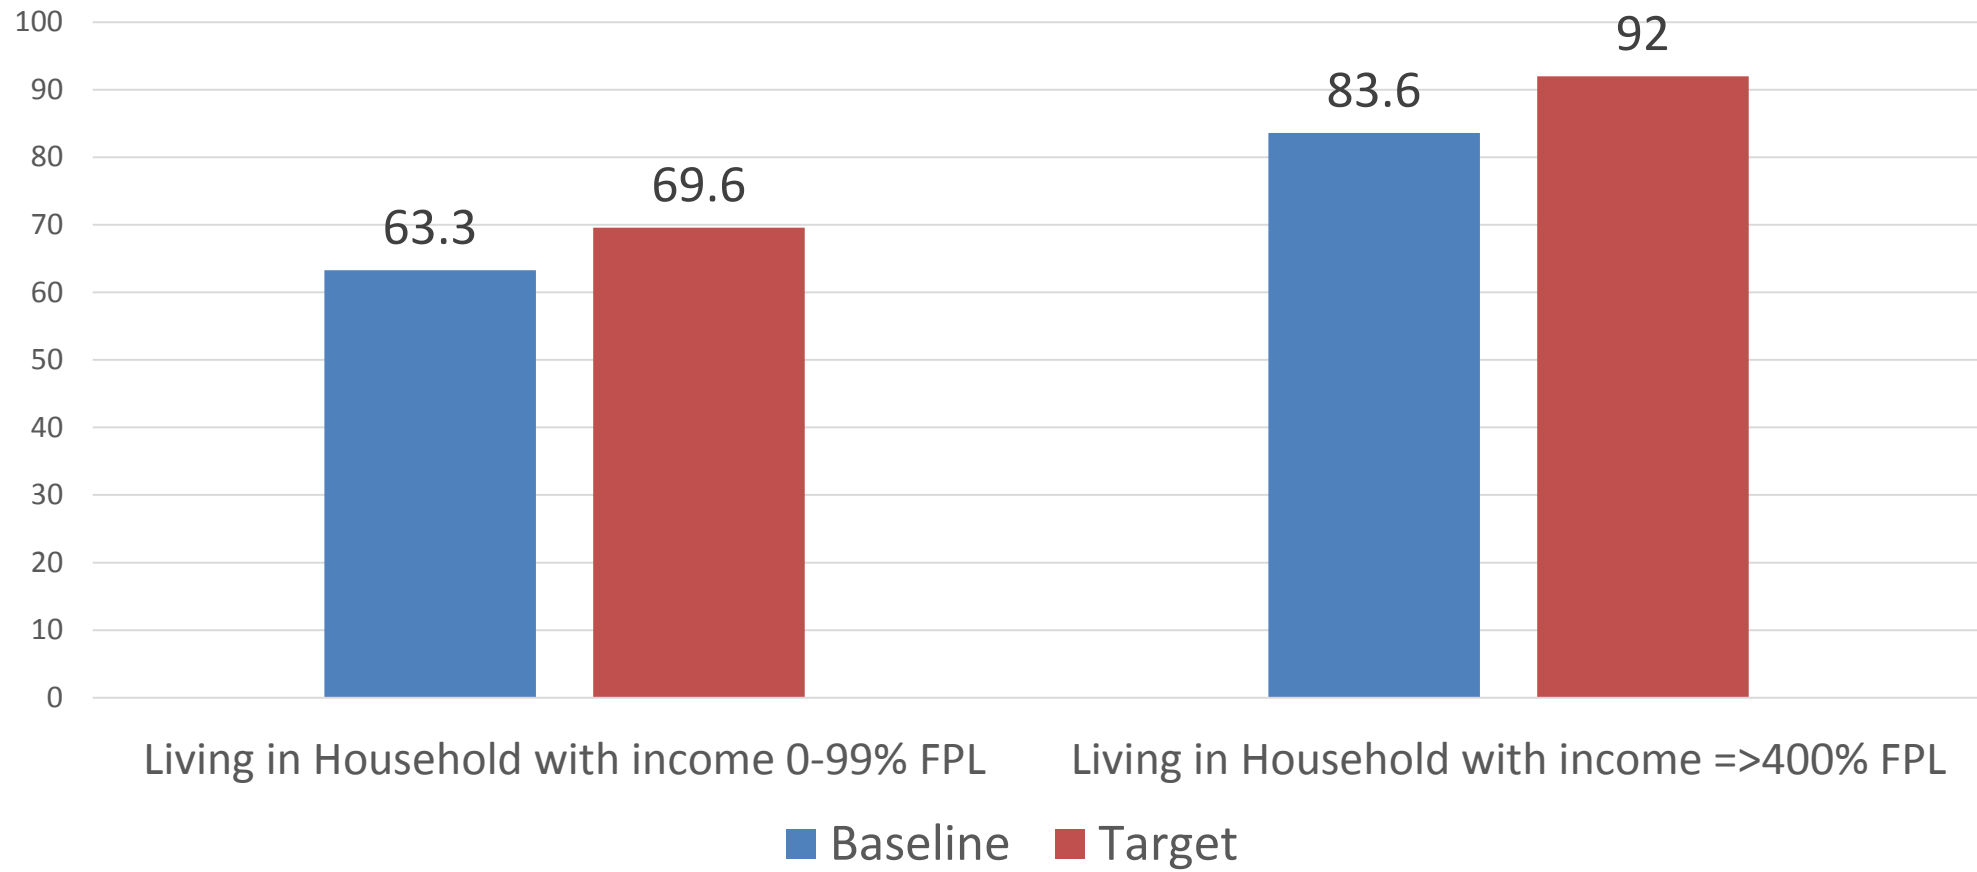

National – Prevalence in 6-11 year old children in the 2011-2014 survey

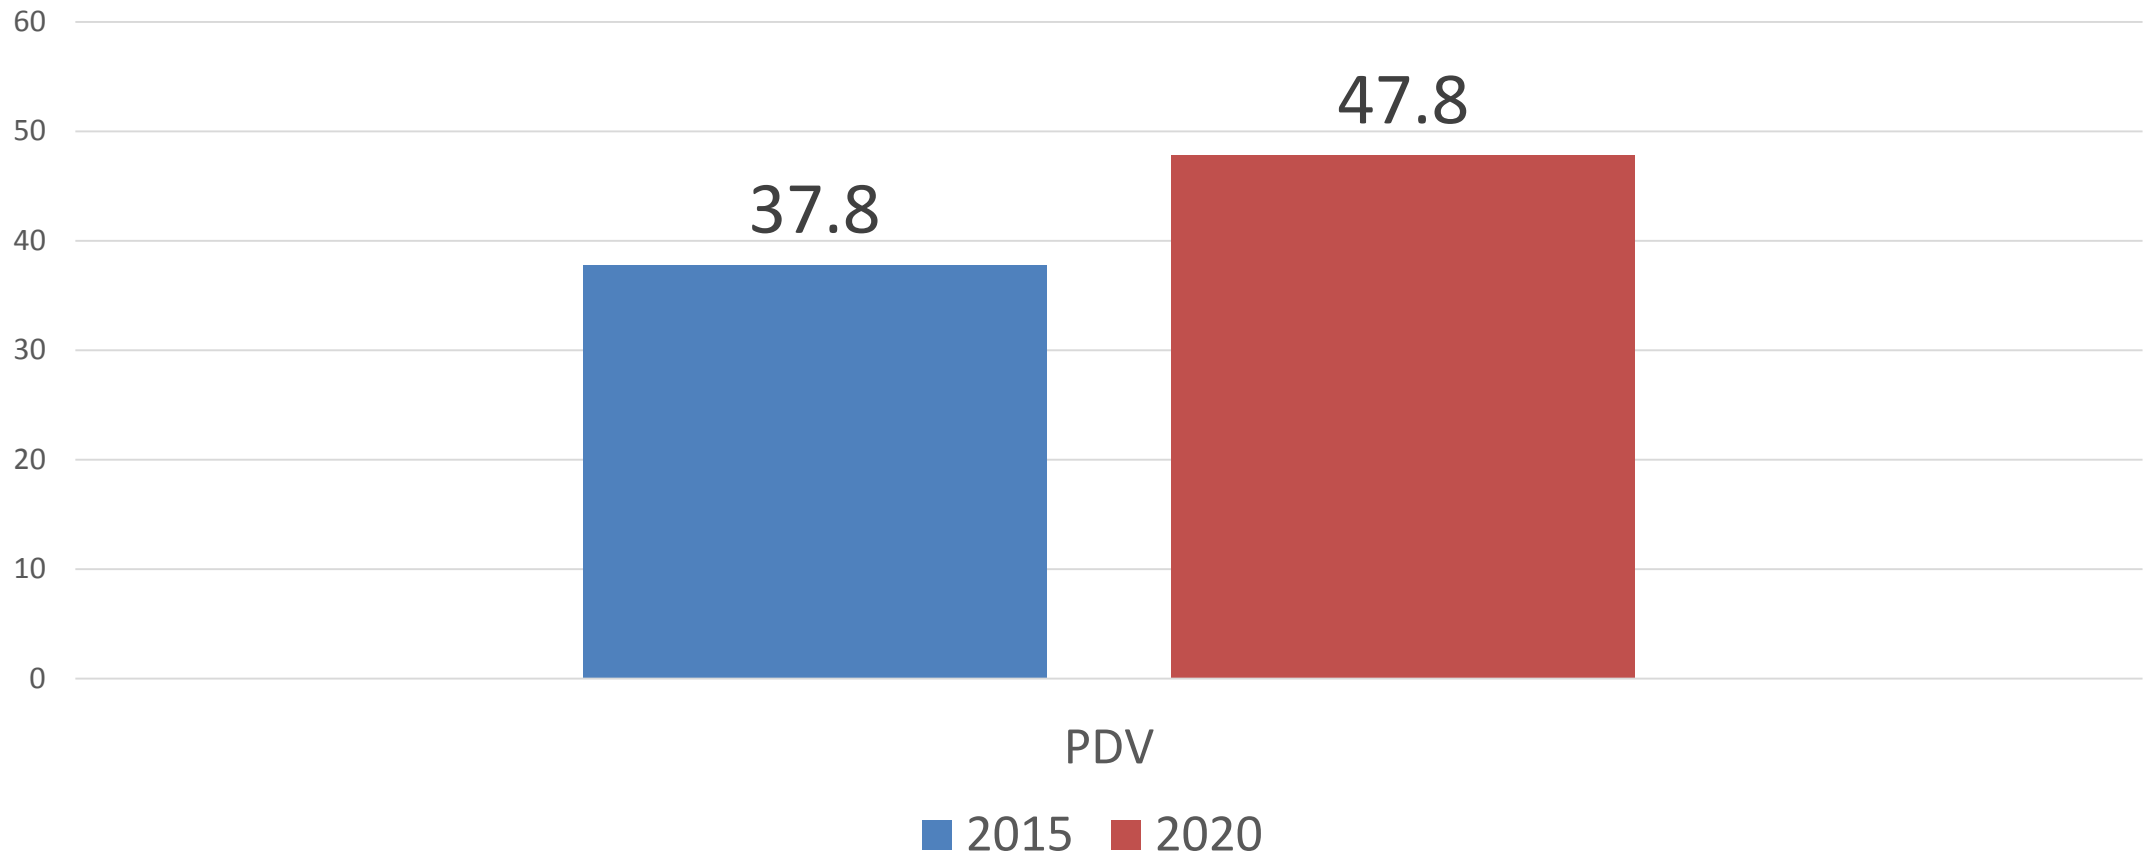

Local Oral Health Programs can:

- Inform and educate parents, providers and policy makers.
- Target school-based sealant programs to areas where children are at higher risk for cavities and facilitate the establishment of programs.
- Track the number of schools and children participating in sealant programs.
- Identify funding sources that support school-based sealant programs and communicate them to providers in the community.
- Help schools connect to dental providers in the community.

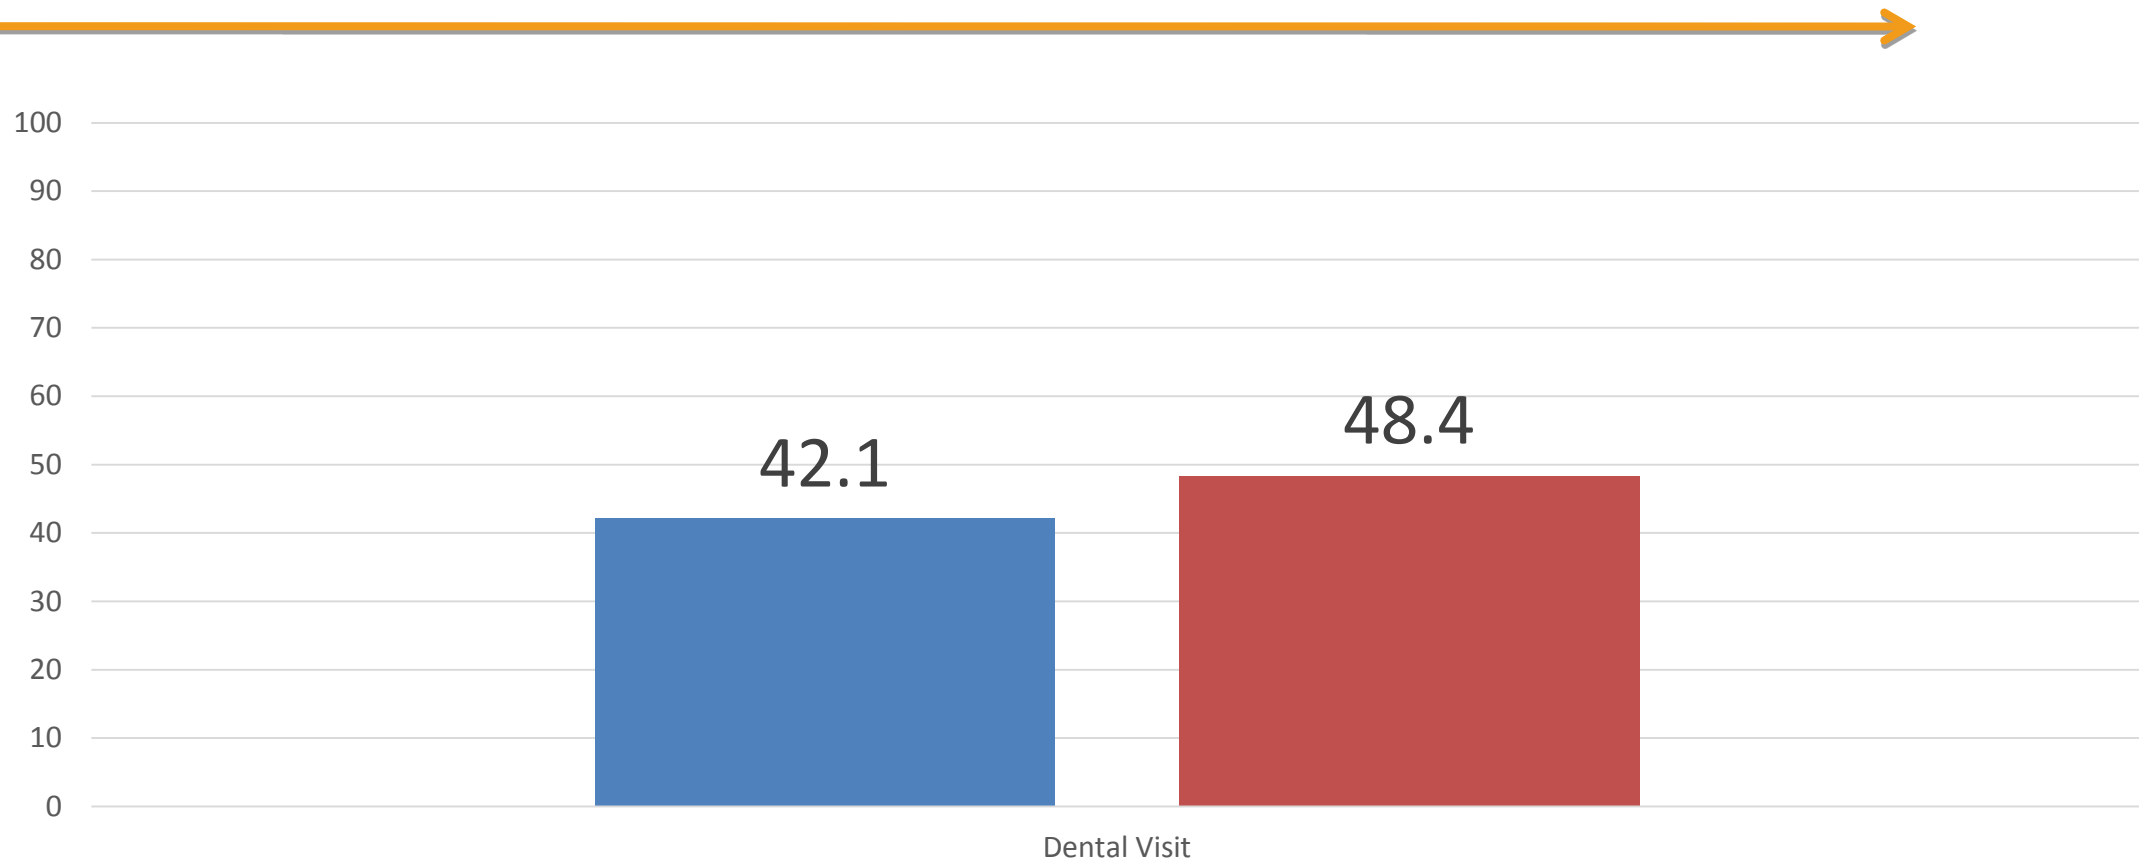

Preventive Dental Visit (%) in Children National Health Survey of Children (1-17 Years)

Preventive Dental Visit (%) among Children enrolled in the Medi Cal Program (0-20 years)

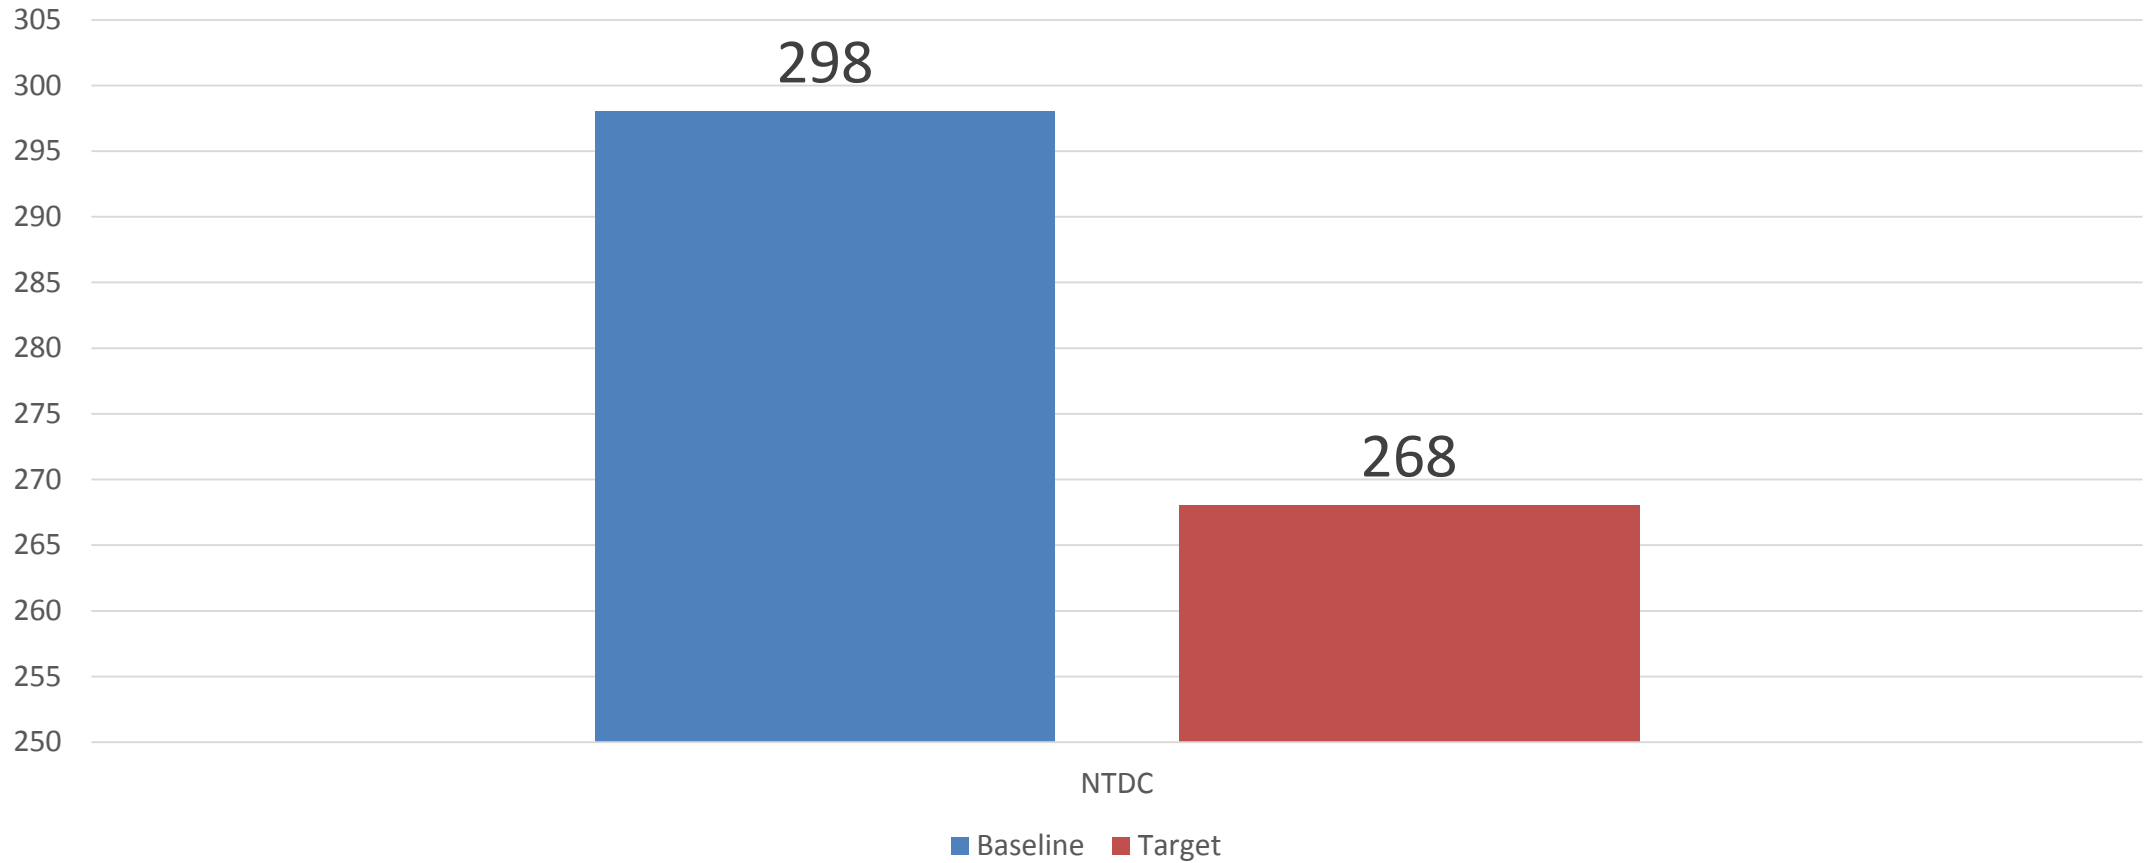

Dental Visit (%) during Pregnancy

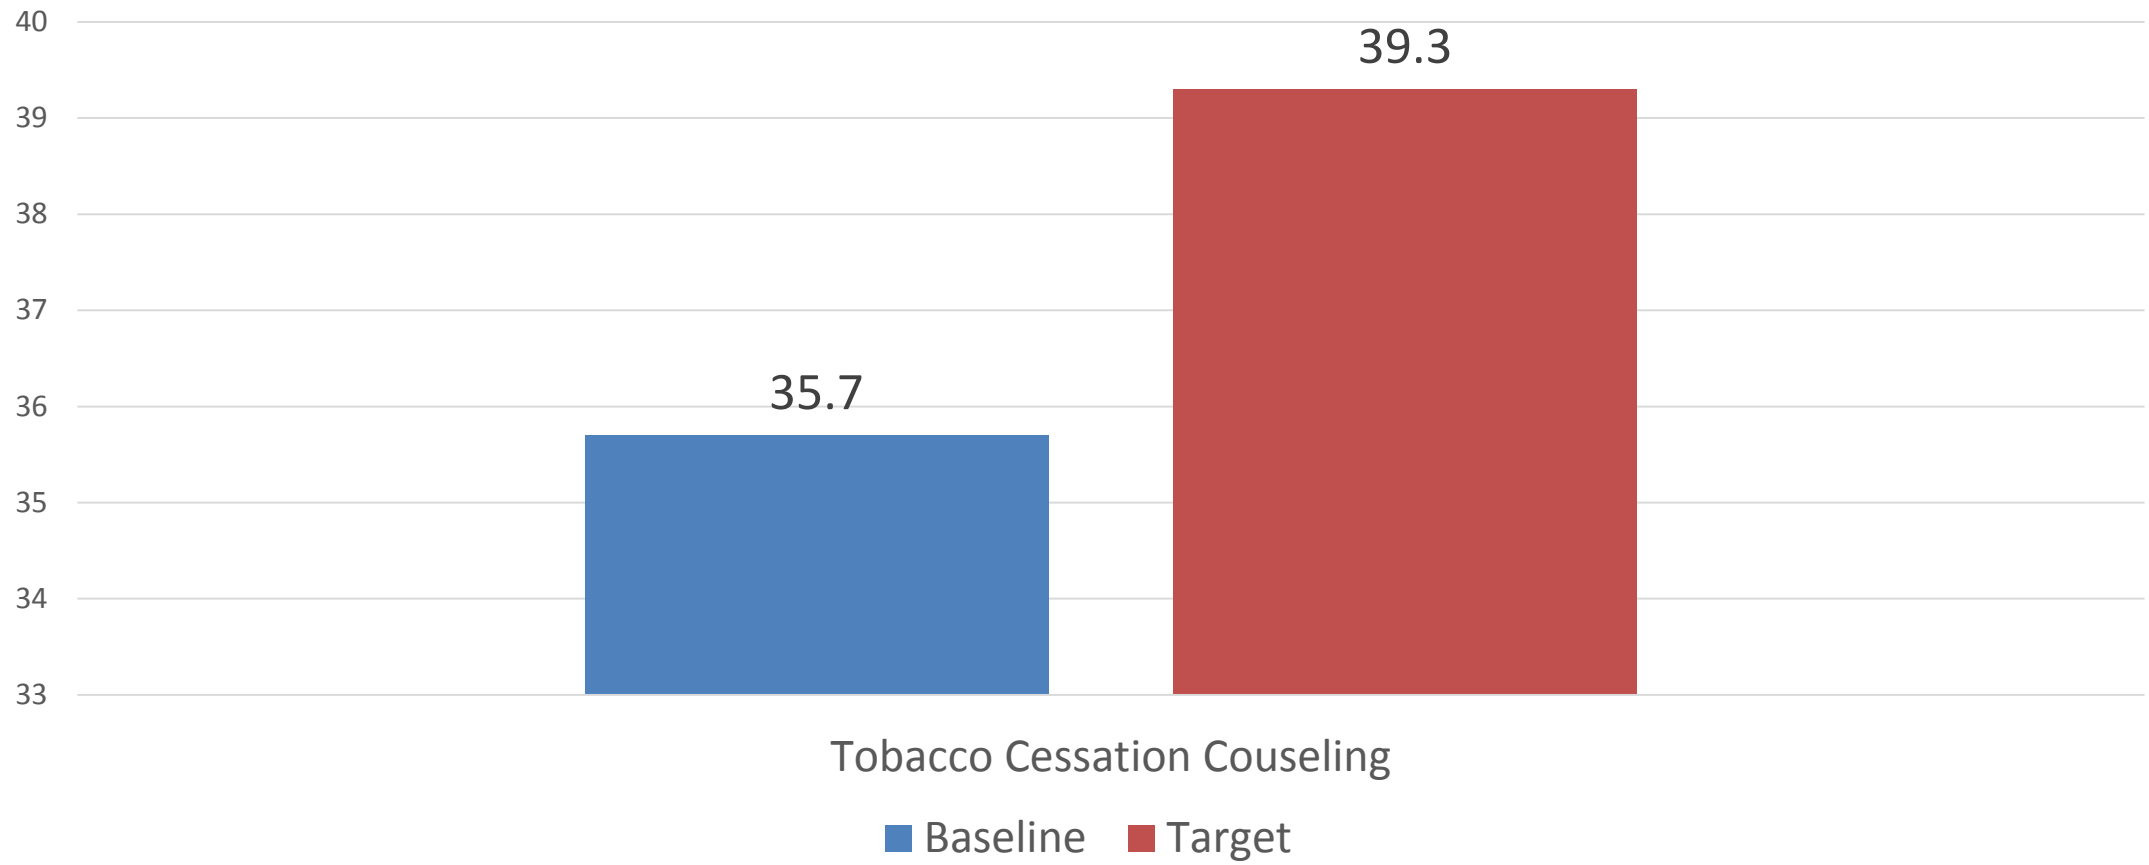

■ Baseline ■ Target

Emergency room dental visits for non-traumatic conditions per 100,000

Tobacco Cessation Counseling in Dental Offices (%)

Expectations

- Develop a plan to improve oral health
- Prioritize actions
- Implement interventions
- Monitor process and outcomes

Thank You
