

# Support tobacco cessation in your dental practice

Free CE opportunity for California dental providers

## Overview

This **FREE** online continuing education (CE) course and **accompanying toolkit** for California dentists, dental hygienists, and dental assistants reviews the oral and systemic health implications of new and emerging tobacco products, like e-cigarettes (vapes), and offers evidence-based strategies to implement brief tobacco cessation interventions in practice.

## Course objectives

After this course, attendees will be able to:

- **Describe** the health effects of e-cigarettes, cannabis, and other tobacco products
- **Perform** effective tobacco cessation interventions in dental settings
- **Enhance** patient motivation to quit
- **Connect** patients ready to quit with resources to help them be successful
- **Integrate** tobacco cessation treatment into routine dental care
- **Improve** patient communication
