

HOPE SCHOOL

Drive-Thru Oral Health Fair

Hope School Campus
Saturday
August 29, 2020
9 a.m.-12:30 p.m.

Program Collaboration

Community Partners and Sponsors

Hope School District

Concept and Development

Welcome Every Baby Family Connects planned a diaper distribution for their families in need and brought idea to others.

Health Linkages needed a way to provide services to students not accessible due to COVID restrictions.

Planning Process

Drive-Thru Event Permission

- Local Oral Health Program Director asked The Santa Barbara County of Education (SBCEO), Assistant Superintendent for approval.
- Assistant Superintendent submitted email for approval to the SBCEO Superintendent.
- Approval was granted from the SBCEO Superintendent.

Approval from SBPHD

- SBCEO Assistant Superintendent asked Santa Barbara County Public Health permission for the event to happen in the Santa Barbara Community.
- Public Health approved of event and categorized Health Linkages as an essential program in the community.

Focus Population

- **Families from Welcome Every Baby Family Connects**
 - Past WEB-FC families with children age 9 - 36 months were invited via phone call/text message. Zip codes were used to identify families living near Hope School.
- **Kindergarten Students**
 - Local Oral Health Program Director contacted Superintendent from one of our school districts (Hope Elementary School District) to offer services to the Transitional Kindergarten (TK) and Kindergarten classes they have. Superintendent from Hope School District loved the idea and assigned their District School Nurse to coordinate with us.
 - A flyer was created and sent via Parent Square to all parents whose kids were enrolled. Parents called us to schedule an appoint to attend event.

All families received a text with video link and confirmation date/time of “drive thru appointment.”

Flyer (English & Spanish)

**DRIVE-THRU
ORAL HEALTH FAIR**

Saturday, August 29, 2020
9:00 am to 12:00 pm

- Visita Al Dentista
- Fluroro 5x Al Año

WHY DO CHILDREN NEED FLUORIDE?

Our mouths contain BACTERIA

That bacteria combines with sugars in the foods we eat and the beverages we drink and produces...

= ACID

The acid that is produced harms tooth enamel and damages teeth

FLUORIDE PROTECTS TEETH BY MAKING THEM MORE RESISTANT TO ACID

Get Your Fluoride Here!

- Drink fluoridated water
- Brush your teeth with toothpaste that contains fluoride
- Visit your dentist or dental professional for fluoride treatments

FLUORIDE IS AN IMPORTANT MINERAL FOR ALL CHILDREN. TALK TO YOUR DOCTOR OR DENTIST TO LEARN MORE.

3. Name of Child: _____ DOB: _____
Type of Health Assessment: Medical: _____ Dental: _____

Name of Parent or Guardian: _____
Provide services during the period of: July 26, ____ to Aug 30, ____

The goal of Health Linkages Program is to improve health outcomes for Santa Barbara County children by identifying health concerns, increasing access to health services, and improving the ability of teachers, school providers, and parents to respond to their physical and behavioral needs.

I hereby give permission for the Health Linkages Program to perform the following health services:

- Fluoride varnish application twice a year
- Dental O2P Health Assessment

8/23/2018 10:22:22AM SBCEO Health Linkages Program submits claims through Medical Billing Technologies, Inc. (MBT) to Dental Health for Florida services applied to children covered under Medi-Cal. No other insurance coverage or health plans are listed; there is no dual or one-legal-kind-of-insurance status.

The Oral Health Program Manager, Health Advocates and volunteers will apply fluoride varnish. Volunteer dentists will conduct the dental screenings. These screenings are not comprehensive exams and should not take the place of regular checkups. The purpose of the assessment is to look for possible oral health concerns.

I have read the above and it has been explained to my satisfaction. I understand that I am making my consent to the screening, and fluoride varnish application offered by the Health Linkages Program and permission to share information about my child at any time by submitting such request to working to the Health Linkages Program Office. I acknowledge that I have received a copy of this form.

PHOTO/VIDEO/WEBSITE CONSENT AND RELEASE FORM

Dear Parent/Guardian/Adult Student:

On occasion, representatives from and/or employees of the Santa Barbara County Education Office wish to photograph, videotape, and/or interview individuals in connection with school programs, projects, or events. Similarly, the Santa Barbara County Education Office wishes to display students' creative works.

In order to release photographs, video footage, creative student works and/or comments, and/or to post on SBCEO website, we need written permission. To give your consent, please complete the form below.

I, _____ parent/guardian of _____ or adult student representing myself, grant the Santa Barbara County Education Office (SBCEO) permission to use any and/or any child's photographic image or creative works.

With respect to all photos, videotaping, audio recordings, creative student works and any reproductions of same in any medium including the SBCEO website, I consent to and authorize their use by SBCEO for reproduction, distribution, and exhibition for any purpose and in any medium whatsoever including (but not limited to) publication, website, broadcast, display, and exhibition for educational purposes, without any compensation or notice to me.

I agree that I and/or my child shall have no right, title, or interest in any photo or videotape covered by this agreement and waive any right to compensation for such use.

Local agencies link together for special event to benefit families in need

KENNETH SONG/NEWS-PRESS PHOTOS

Welcome Every Baby Family Connects, Health Linkages and other sponsors came together Saturday to help Hope Elementary School students and their families. Above, Kavneet Bhatti performs a free dental screening to a toddler.

"It really was a great collaborative effort about two months in the making. We really wanted to make sure we could do it in a safe way and it really just went great," Ms. Rehse said.

Beth Vidmar, left, and Maisie Schulman prepare diapers for distribution. The event helped about 50 families, with each of them receiving a slew of goodies including fresh produce, dental kits, educational books, checkups and more.

Agencies that helped the event run smoothly

happen was important," Ms. Rehse said.

Ava Medina grabs a tool in preparation for a drive-in dental screening.

While many kids and even adults might dread going to the dentist, yearly checkups are important, especially at a young age.

"You forget about your teeth easily, especially when you're not being constantly reminded, you're not going to school and you're not really getting that
